

## SYLLABUS for TOPICS IN CELL BIOLOGY AND NEUROSCIENCE (01:146:464) Fall 2023

**Course Director:** Martin Grumet, PhD [mgrumet@dls.rutgers.edu](mailto:mgrumet@dls.rutgers.edu)

**Course Faculty:** Patricia Morton, PhD [patricia.morton@rutgers.edu](mailto:patricia.morton@rutgers.edu)

Wise Young, MD/PhD [wisey@dls.rutgers.edu](mailto:wisey@dls.rutgers.edu)

**Topics:** This course will focus on nervous system development and recovery after neural trauma. Properties of stem cells will be discussed in particular as they relate to development and as a foundation for exploring roles they could play in developing therapies for diseases. Classes will focus on:

1. The art of reading scientific literature, scientific investigation, oral presentation and writing.
2. Early development of the embryo and the nervous system as a foundation for understanding roles of stem cells and their differentiation.
3. Differentiation of neural stem cells into neurons and glial cells during nervous system development and in the adult.
4. Spinal cord injury dogmas and mechanisms that promote regeneration after injury.
5. Diseases in the nervous and evolving treatments.
6. Development, degeneration, and regeneration of the inner ear.
7. Cell adhesion molecules in development, synaptic plasticity and regeneration.

**Learning Goals:** The learning goals for this course are consistent with general goals set by the Department of Cell Biology and Neuroscience, as well as the Division of Life Sciences. They include:

1. Obtain factual and conceptual knowledge in neurodevelopment, neural trauma and stem cells, and explore therapies for treating neural disease.
2. Develop an ability to summarize, integrate and organize scientific literature.
3. Use scientific logic and literature to develop a research project related to course subjects that will be presented orally to the class and in written form as a final paper.
4. Develop the ability to critique scientific literature from logical, feasible and ethical points of view for their relevance to human health and our society.

**Required Materials:** This course will be taught using Canvas. There is no text for the course. Students are encouraged and will be trained to investigate scientific literature. Lectures will be recorded and made available on Canvas.

**Grading Policy:** The primary assignment for the course is a research project by each student focused on published papers. Each student will prepare an oral presentation to be delivered in class and a final written paper submitted at the end of the semester. Grades are based on:

1. Outline of Project (**10%**): Prepare an outline as a roadmap for the project. Include sections on Background and significance, Hypothesis, Experimental Methods, Results, and Discussion.

2. Oral presentation (**30%**): Provide appropriate background to understand your hypothesis/idea, explain its significance, provide a plan for experimental approaches, and discuss outcomes and future directions. Detailed rubrics will be provided.
3. Final paper (**40%**): Builds on your oral presentation to explain and document your project in more detail based on the scientific literature. Incorporate faculty suggestions made during the development of your proposal and following your oral presentation. Detailed rubrics will be provided.
4. Class participation (**20%**) and Extra Credit (up to 5%): Following each student's oral presentation, students will write about each of their peers presentations a thoughtful question, or highlight the significance of the project or its potential future directions. Comments should be <100 words. Submit them the next day. These written comments will represent **10%** of your grade. They will be graded as outstanding (15), adequate (10), in-adequate (5) or 0 for no comments (includes un-excused absence or failure to submit on time). Each student's average score from all peer talks attended will represent 10% for this part of class participation. Students with scores above 10 can get as much as 5% extra credit towards their final grade. Student attendance and participation in classroom discussions represents **10%** of your grade.

**Schedule:** This course will be conducted synchronously online on Tuesday and Thursday afternoons (3:50-5:10 PM) in Nelson D251 Conference room. Students are expected to attend and participate in discussions and interface with faculty and peers. Students should recognize that there is no make up for lack of participation. Office hours will be available at scheduled times to be set at the beginning to maximally accommodate students' schedules. These conferences will be held live or online through Zoom. Students that require additional assistance will be able to schedule individual appointments. Students are expected to have experience using Canvas.

**Class Organization:** This course is designed for no more than 20 students to encourage student participation and discussions during class. In many classes as much as half the time is allotted for discussions, first of methods for selecting student topics and then discussion of specific topics. Each student is expected to discuss their topics in class informally. Students who don't speak up will be called on to discuss their topics. This process will be continued during office hours on a voluntary basis.

The course is divided into two major modules that will be taught by Drs. Martin Grumet and Wise Young, along with two minor modules by Drs. Kelvin Kwan and Melitta Schachner, all of whom are faculty in CBN and members of The WM Keck Center for Collaborative Neuroscience including Dr. Patricia Morton, who will host a guest speaker for a presentation - Living with Spinal Cord Injury. Dr. Morton will attend all sessions and she plays a major role in administration of the course and communications with students.

Schedule for Special Topics in Cell Bio & Neuro (01:146:464) Fall 2023

Tuesday/Thursday 3:50-5:10pm

Keck Center Conference Room

Class	Date	Lecturer	Topic
1	9/5	Grumet/Morton	Introduction: Discussion of Student Projects
2	9/7	Grumet.2	Embryo Development & Stem Cells
3	9/12	Grumet.3	Neural Development
4	9/14	Grumet.4	iPS & Reprogramming Neurons
5	9/19	Grumet.5	Adult Stem Cells & Meetings in Class to Discuss Projects
	9/21	Deadline	Submit Preferences for Student Projects
6	9/21	Grumet.6	Neuroinflammation & Multiple Sclerosis
7	9/26	Grumet.7	MSC Treatment of ARDS in COVID-19
8	9/28	Grumet/Morton	Project Meetings in Class
9	<b>10/3</b>	<b>Morton</b>	<b>Living with Spinal Cord Injury: TBD</b>
	10/5	Deadline	First Draft of Student Outlines due
10	10/5	Young.1	The Art of Scientific Writing*
11	10/10	Young.2	Spinal Cord Injury Dogmas
12	10/12	Young.3	Spinal Cord Regeneration
13	10/17	Young.4	Stem Cells Paradigm Shift
	10/19	Deadline	Second Draft of Outlines due
14	10/19	Young.5	Lithium Treatment and Mechanisms
15	10/24	Young.6	Ethics of Clinical Trials*
16	10/26	Grumet.8	Stem Cells and Spinal Cord Injury
17	10/31	Grumet.9	Neural Stem Cells & Zika Virus
18	11/2	Schachner.1	Cell adhesion molecules in neural development
19	11/7	Schachner.2	Adhesion molecules in synaptic plasticity and recovery after trauma
20	11/9	Kwan.1	Development and Degeneration of the Inner Ear
21	11/14	Kwan.2	Regenerating Sensory Cells of the Inner Ear
22	11/16	Grumet/Morton	Work on Presentations; Review Grading Templates
23	11/21	Grumet	Work on Presentations
	11/23		THANKSGIVING BREAK
24	11/28	Grumet/Morton	Student Presentations
25	11/30	Grumet/Morton	Student Presentations
26	12/5	Grumet/Morton	Student Presentations
27	12/7	Grumet/Morton	Student Presentations
28	12/12	Grumet/Morton	Student Presentations

\*Indicate skills training sessions.

## **Course Policies and Resources**

### **Academic Integrity Policy:**

<http://academicintegrity.rutgers.edu/academic-integrity-policy>

Violations include: cheating, fabrication, plagiarism, denying others access to information or material, and facilitating violations of academic integrity.

### **Student-Wellness Services:**

Just In Case Web App

<http://codu.co/cee05e>

Access helpful mental health information and resources for yourself or a friend in a mental health crisis on your smartphone or tablet and easily contact CAPS or RUPD.

Counseling, ADAP & Psychiatric Services (CAPS)

(848) 932-7884

17 Senior Street, New Brunswick, NJ 08901

[www.rhscaps.rutgers.edu/](http://www.rhscaps.rutgers.edu/)

CAPS is a University mental health support service that includes counseling, alcohol and other drug assistance, and psychiatric services staffed by a team of professional within Rutgers Health services to support students' efforts to succeed at Rutgers University. CAPS offers a variety of services that include: individual therapy, group therapy and workshops, crisis intervention, referral to specialists in the community and consultation and collaboration with campus partners.

Crisis Intervention:

<http://health.rutgers.edu/medical-counseling-services/counseling/crisis-intervention>

Report a Concern: <http://health.rutgers.edu/do-something-to-help>

Violence Prevention & Victim Assistance (VPVA)

(848) 932-1181

3 Bartlett Street, New Brunswick, NJ 08901

[www.vpva.rutgers.edu](http://www.vpva.rutgers.edu)

The Office for Violence Prevention and Victim Assistance provides confidential crisis intervention, counseling and advocacy for victims of sexual and relationship violence and stalking to students, staff and faculty. To reach staff during office hours when the university is open or to reach an advocate after hours, call 848-932-1181.

## Disability Services

(848) 445-6800

Lucy Stone Hall, Suite A145, 54 Joyce Kilmer Avenue, Piscataway, NJ 08854 /

<https://ods.rutgers.edu>

Rutgers University welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentation:

<https://ods.rutgers.edu/students/documentation-guidelines>. If the documentation supports your request for reasonable accommodations, your campus's disability services office will provide you with a Letter of Accommodations. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. To begin this process, please complete the Registration form on the ODS web site at: <https://ods.rutgers.edu/students/registration-form>.

## Scarlet Listeners

(732) 247-5555

<http://www.scarletlisteners.com>

Free and confidential peer counseling and referral hotline, providing a comforting and supportive safe space.
